# WFSBP Treatment Guidelines and the problem of evidence grading

Hans Jürgen Möller

From 1<sup>st</sup> International Congress on Neurobiology and Clinical Psychopharmacology and European Psychiatric Association Conference on Treatment Guidance  
Thessaloniki, Greece. 19-22 November 2009

The World Federation of Societies of Biological Psychiatry (WFSBP) has developed several drug treatment guidelines. The following guidelines have either been published already or will be published soon [1-8]

Published: 22 April 2010

8. Grunze H, Vieta E, Goodwin G, Bowden C, Licht RW, Möller HJ, Kasper S: **Treatment of acute bipolar depression: The World Federation of Societies of Biological Psychiatry (WFSBP) Task Force on Treatment Guidelines for Bipolar Disorders.** *World J Biol Psychiatry* 2009, WFSBP guidelines are developed by special WFSBP task forces which include members of the WFSBP as well as non-WFSBP colleagues seen as international experts in the relevant field. The task forces are composed with the aim to include knowledge and experience in the guidelines from every part of the world, not only the western hemisphere. The core characteristic of the evidence criteria is that meta-analyses are not seen as the most important factors for a high grade of evidence, but the results of well-designed studies. This approach is closer to the decision process of the most important regulatory authorities such as the FDA or the EMEA/CPMP. Recently the evidence criteria have been optimised (Bandelow B, Zohar J, Kasper S, Möller HJ (2008): *World J Biol Psychiatry* 9(4): 242-247)..

## Submit your next manuscript to BioMed Central and take full advantage of:

- Convenient online submission
- Thorough peer review
- No space constraints or color figure charges
- Immediate publication on acceptance
- Inclusion in PubMed, CAS, Scopus and Google Scholar
- Research which is freely available for redistribution

Submit your manuscript at
